3.2.1: Institution has created an ecosystem for innovations and has initiatives for creation and transfer of knowledge

PIPS has developed a dynamic ecosystem that fosters innovation and facilitates the exchange of technical knowledge between students and faculty through its incubation centre. The institution has established a dedicated R&D cell, led by the Dean of R&D, to promote research activities. This cell focuses on both minor and major student projects, working closely with funding agencies throughout the course of study. The R&D cell also supports faculty and students in publishing high-quality papers in reputed journals with significant impact factors. To further enhance research capabilities, the cell organizes workshops on topics such as effective paper writing, avoiding plagiarism, and identifying quality journals, ensuring that both faculty and students meet their research objectives. The management at PIPS is deeply committed to advancing research and innovation. They actively encourage faculty and students to explore new ideas by providing the necessary infrastructure and financial support. The college's Entrepreneur Development Cell (EDC) is dedicated to nurturing future entrepreneurs, with a focus on generating employment through technological advancements. The EDC aims to improve students' managerial and leadership skills by offering opportunities to attend workshops, visit industries, and gain the competence needed to meet global demands and challenges. Students are encouraged to pursue self-employment and consider establishing small and micro-enterprises as entrepreneurs. The skill set essential for entrepreneurial success includes resource planning, manpower management, financial planning, marketing management, and manufacturing expertise.
